How to achieve a spiked fence look

You will need :

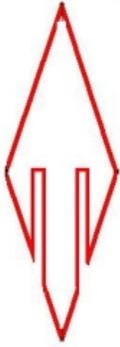

- Plastic corrugated sheet
- Ruler
- Pencil
- Marker
- Sharp Knife
- Black spray paint

Obtained from
Omarshauntedtrail.com

To start with, draw pencil lines down the sheet at every 3 inches, and across at inch intervals.

Using a marker, draw a line from alternate 1 inch lines at a diagonal to each 3 inch line, then draw your next diagonal from the 3 inch line back to the next 1 inch line down, and by extending each line through you should have a number of diamonds 6 inches long by 2 inches wide which you can now cut out.

Cut out slits
on each
diamond

Next you will need to make vertical cuts $\frac{5}{8}$ inch from each side and $\frac{1}{8}$ inch wide. This leaves a centre piece $\frac{1}{2}$ inch to insert into your fence post

Spiked
Fence
Posts

Spray black and insert into each post on your fence
