PVC Dummy How-To

Wanna make poseable monsters for your Halloween display???

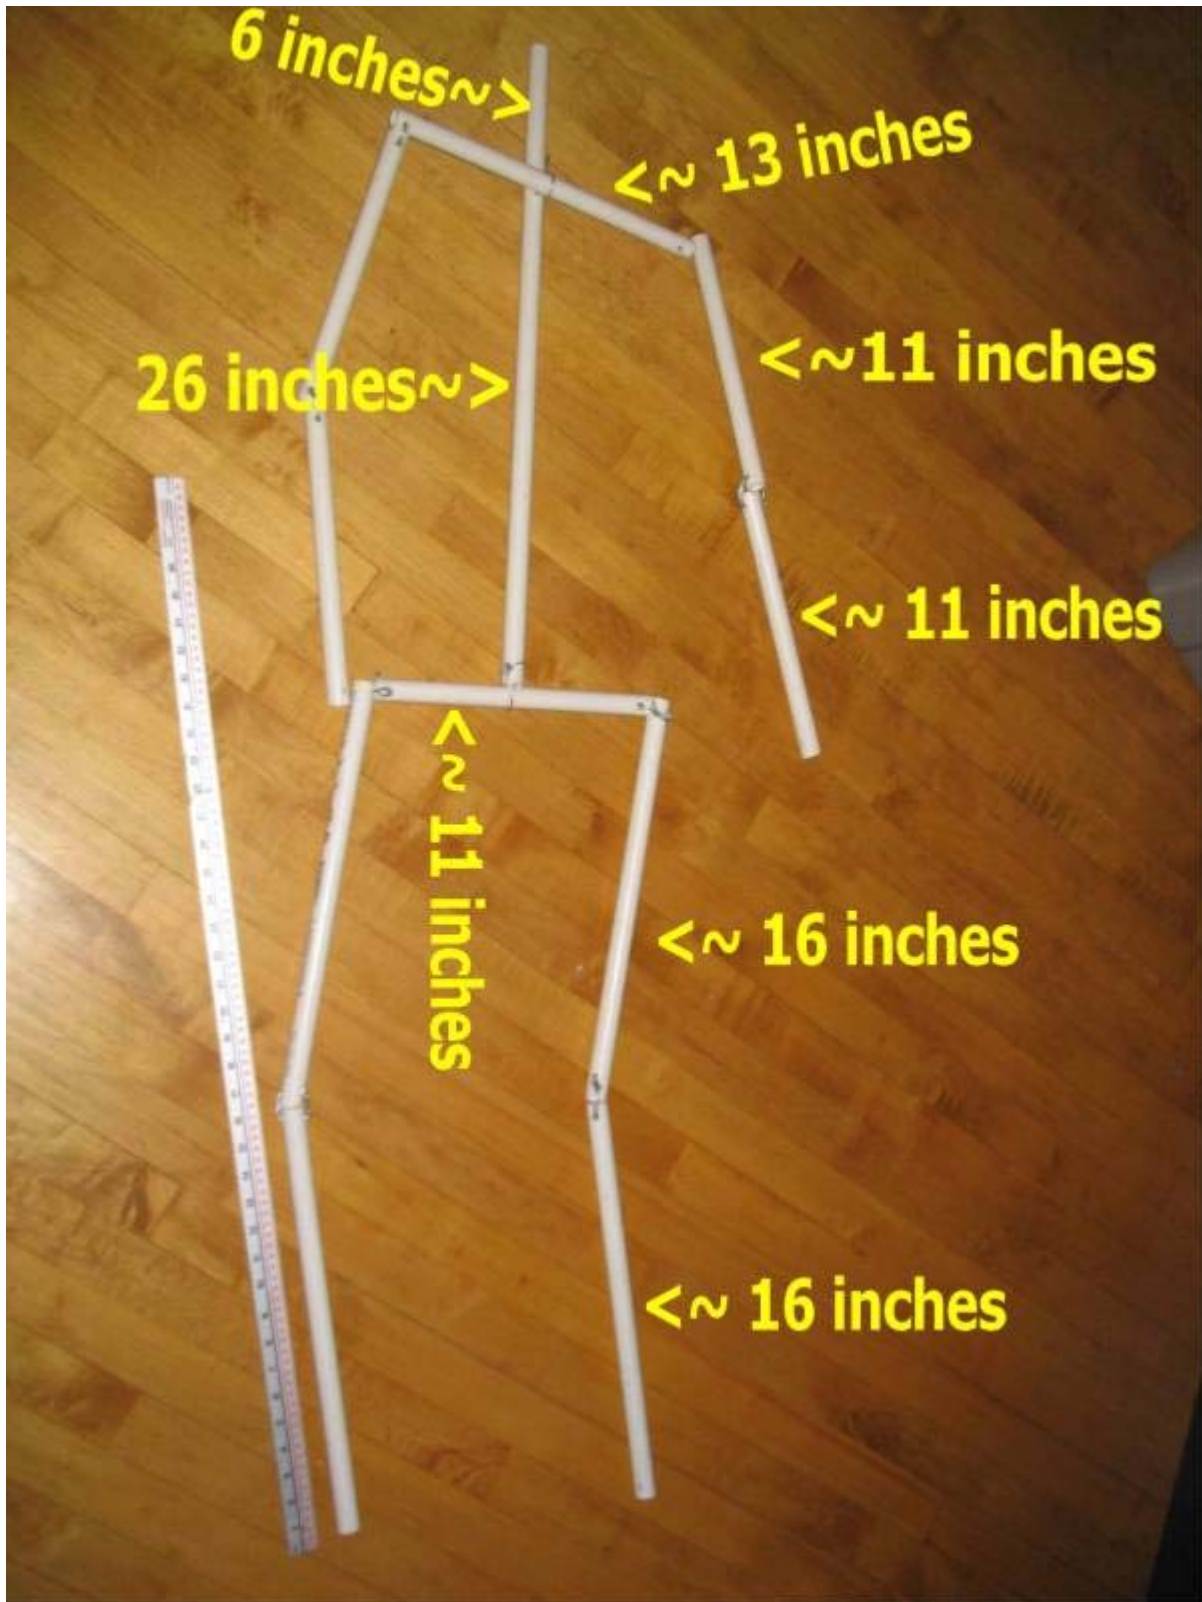

Here is a cheap and easy way to go about doing it. Here is just one example of a monster made with the PVC dummy

Using 1/2 inch PVC cut the pieces to the sizes below.. these measurements were taken from a Bucky Skeleton ... you may make them larger or smaller depending on the size monster you wish to create... Drill holes into the ends of all your PVC so that you may secure the joints with wire... to keep the monster pose able ...
