A PIRATE'S PAL

<http://www.born2haunt.com/mollypolly01.html>

This baby is Molly The Polly. She listens and repeats what she hears. She also flaps her wings and has red glowing eyes. I left the ribs open for the mic and speaker to work. She will be part of my pirate display.

I took one of those 10 dollar parrot that repeats what it hears and gave her a little bit of a mean streak. It was real easy to build on the body once I took off her feathers. I use the little parrot last year and people love it. Now I've got two to use.

I added a little color. This is going to be one mean bird. More to come
