## Pillar Construction

### Parts List:

- 1 4' x 4' sheet 1/2" exterior BC plywood
- 1 4' x 4' sheet 1/4" exterior BC plywood
- 2 1" x 5" x 8' Clear Pine (no knots)
- 2 2" x 3" x 8' Stud
- 1 Urn style flower pot
- 1 8" toy ball, or similar
- Box 2" Construction screws (not drywall screws)
- PL200 construction adhesive, or equivalent
- Quart Grey Latex Paint
- 2 cans Granite or Marble texture spray paint (color of your choice)

Assemble 1/2" walls and 2x3 pieces into a box.

Cut out a piece of 1/2" plywood to fit the top and attach to top of studs.

Measure 1x5's and attach to top and bottom of box.

Cut 2x3's into 4 foot lengths. Cut 1/2" plywood into 15" widths, 4 feet high. Cut out rectangle from center of each, measure twice the width of 1x5 from bottom and top, and 4" in from the sides. Cut 1/4" plywood to just larger than these holes. Using construction adhesive, glue 1/4" plywood to **inside** of each 1/2" piece.

Cut off bottom of flower pot using saw.

Using adhesive, attach flower pot (upside down) to top of pillar and ball to flower pot.

Paint with 2 coats of grey latex. When dry, coat with texture paint.
