Commercial Dimmers

Those not interested in building their own lamp dimmers will be glad to know that there are commercial alternatives.

Alternatives

The ability to dim any light is built into X-10. If you control lights and effects via DMX, you can use a "dimmer pack".

If you already use these technologies, taking advantage of their dimming ability is the easiest way to turn down the lights a little.

Gallery of stand-alone dimmers

Check out your local home supply store's electrical department for external dimmer boxes.

Here are some I have found...

This unit, from [Harbor Freight Tools](#) (#43060), is sold as a motor speed control for a router. It will also function as a lamp dimmer, handling a load up to 15 Amps.

This lamp dimmer, from [Home Depot](#), is intended to sit on the floor; you nudge the slider with your foot. This unit handles a load up to 500 Watts.
