Flash News Report

Have a living room scene with an old 25" screen TV playing and no one else in the room. The TV provides the only light, and it is playing a VHS tape (from a hidden VCR) made earlier of a television show being interrupted by a special news flash.

The news announcer claims they are reporting live at the scene of a haunted house where police have tracked down a psychotic serial murderer. The announcer continues by saying the police report there is still a small group of patrons inside unaware of the situation.

The murderer is inside the house with them armed with a large knife that he just used to stab a convenience store employee. Then an actor in a prison costume brandishing a large knife jumps out from behind the couch lunging at the patrons with one manic scream. Turn on a strobe light to make the situation even more frightening.
