## Lost Trick-or-Treater

For added effect, have a plant (a helper dressed like another trick-or-treater) go up to the house with each group of other treaters. The ghost, monster, skeleton, corpse, vampire, witch, or whoever answers the door in costume grabs him at the front door, and drags him back into the house screaming and kicking (never to be seen again). A simpler approach is to have the plant trick-or-treater wear a fake arm that is attached with Velcro, so the monster at the door can rip it off (use only to scare older kids).

- Another figure to answer the door could include a headless man (headless torso prop available from reference vendors) or a floating head using luminous make-up.
- Finally, consider having a large corpse figure quietly slip in with the group from behind a parked car, a tree, or a large bush while they are heading for the door.
