## MIST MAKING SKULL

Purchased at a local Eckerd pharmacy, October 2002.  
The skull is roughly life-size and contains some red LED's and a mist maker. Just pour in some warm water (it holds quite a bit) and plug it in - mist starts to form and flow out of the skull almost immediately.

My little helper examines the new item (at right).

Picture in low light (to show the red lighting)
