Ghoulish Desk Accessories

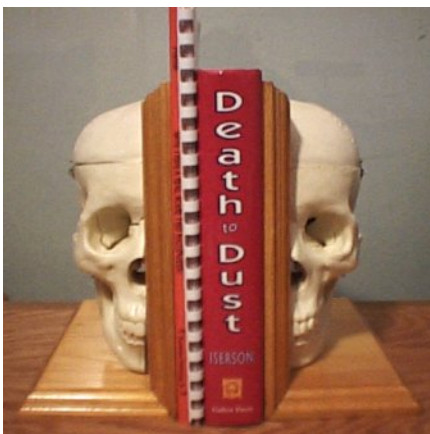

Skull Pen Holder

Using the new "Mini Skull w/ Cervical Vertebrae" from Anatomical, a unfinished wood plaque from a craft store and a pen/funnel set from a office supply store, I made a couple Skull Pen Holders. The perfect desk accessory for any Halloween enthusiast's desk. A little drilling, sanding, and some spray lacquer was all it took.

Skull Bookends

What better to hold up all your Halloween books, than some Skull Bookends.

I used a "backing saw" to cut the skull (from [Anatomical](#)) into two halves. A friend helped me to cut the wood to length and rout a decorative edge. I screwed everything together and added a lacquer finish.
