Horrific Houseplant Costumes: Ferocious Ficus and Rest In Peace Lily

Intro:

Here's how to make scary costumes for your House Plants...And turn your living room into a Little Shop Of Horrors.

Here's a list of your Tools and Materials required:

Materials:

- Styrofoam balls,
- acrylic paints,
- vampire fangs,
- crepe paper sheets,
- pins,
- floral wire and tape

Tools:

- Hot glue gun,
- knife,
- wire cutters,
- scissors

Obtained from Omarshantedtrail.com

Step 1

Make the pod

Cut styrofoam balls in half. I used a kitchen knife.

Step 2

Add color

Paint the outsides green and the insides red. Add red lips to the cut sides of the balls. Let dry.

Step 3

Give it teeth

Insert the teeth between the cut halves of the ball.

Obtained from Omarshantedtrail.com

Step 4

Put it together

Use a straight pin to secure the halves of the ball back together and use hot glue in the corners to secure the teeth.

Step 5

Make foliage

Cut sheet crepe paper into strips with a squiggly bottom. Out of a darker color, cut leaf shapes too.

Obtained from Omarshaintedtrail.com

Step 6

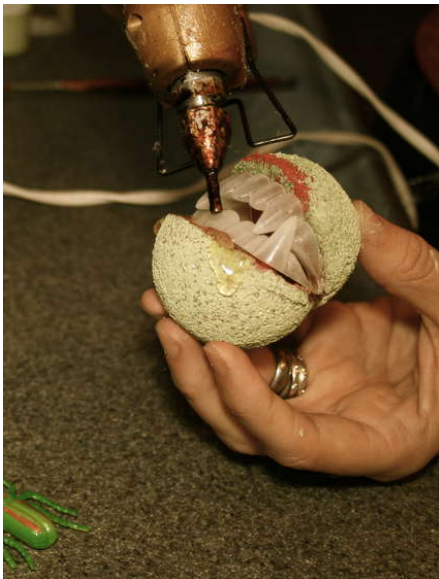

Build the pod

Wrap around the outside of the ball with the squiggly crepe paper and hot glue in place.

Step 7

Make the sappy drool

Use hot glue on the fronts of fangs to create a sappy drool. Let harden.

Step 8

Wire it up

Insert floral wire, (1 foot long- bent in half) into the back of the styrofoam ball with an end in each half. Secure with hot glue and wrap crepe paper to cover back of ball and hot glue.

Step 9

Finishing touches

Wrap wire with floral tape.
Glue on leaves and wrap floral tape to end...

And then wrap the wire around the tree branch!

Mwah-hahahahah!

Step 10

Rest In Peace Lily instructions

Rest In Peace Lily is just a much larger styrofoam ball, painted like an eye and wrapped with cut crepe paper, hot glued in place. It is anchored with a bamboo skewer.
