Monster Mud Headless Skeleton

Thanks to my mother-in-law we now have a monster mud creation!

The drywall compound was left over from renovations. we used the recipe from [Terror Syndicate](#)

Burlap was from unused sandbags when there was flooding a few years back.

Obtained from
Omarshaintedtrail.com

The frame was made with stucco wire left over from yet another project.

Omarshantedtrail.com

The hands were made by taking 2 pairs of the skeleton gloves you can buy from almost anywhere and sewing the rubber backs together.

The face is actually 2 masks. The outer mask is a typical costume mask and there is a \$2 blinking eye skeleton decoration set inside it to give it eyes and shape.

We ran a power adapter up the sleeve to replace the 2 AA batteries for the eye lights.
